## THE SACKETT GROUP CELEBRATES 25TH ANNIVERSARY AND ANNOUNCES WINDOWS 10 COMPATIBILITY FOR FORTE AND MACPAC SOFTWARE AT ILTACON IN LAS VEGAS

**August 31, 2015 – ILTACON, LAS VEGAS** - California-based [The Sackett Group, Inc.](http://www.thesackettgroup.com) (“TSG”) celebrates its 25th year in business today at ILTACON, the annual meeting of [ILTA](http://www.ilta.org) (International Legal Technology Association). The company also debuts four new Windows 10 compatible releases of its Forte and MacPac software applications. See below for more highlights on the software releases.

In honor of its silver anniversary, TSG has a creative exhibit at its ILTACON booth (#805) exploring the evolution of its software which started as a “**Macro Package**” or “MacPac” in WordPerfect and became the fully-integrated MacPac and Forte product lines offered in Microsoft Word today. Entitled “Alice in Wonderland: Re-Envisioned”, the interactive exhibit invites ILTA members on a journey “down the rabbit hole” to work hands-on with vintage technology from the 1990’s such as MacPac for WordPerfect 5.1 DOS – TSG’s first-ever product, introduced in September 1990 – and MacPac for both Word 2.0 and Word 95.

TSG is presenting updates to four of its software programs at ILTACON, including Forte 11.1, Forte Tools 11.1, MacPac 9.9.2 and MacPac Numbering 9.9.6. In addition to having compatibility with Windows 10, each of these releases has been fine-tuned based on Microsoft updates to Office 2013. TSG has completed phase one testing for compatibility with Office 2016 and is preparing updates for full compatibility. The new Forte 11.1 version includes an Insert function on the Forte ribbon, which enables users to create and save their own document packets (i.e., a living will, notary, cover letter, labels) and apply the saved data to all documents simultaneously. The same function works for clauses, precedents, and blocks of text.

Linda Sackett, founder and owner of The Sackett Group, explains, “We are incredibly proud to be celebrating 25

years in the legal software business at ILTACON. As MacPac and Forte have progressed, we have stayed abreast of the latest in document automation and production, all the while inspired by our clients’ suggestions and requests to improve the software. We owe our quarter-century of success to our clients, and we look forward to connecting with them and sharing the history of our technology over the years in an engaging, entertaining way.”

### ABOUT THE SACKETT GROUP, INC.

The Sackett Group, Inc. formerly known as Legal MacPac, was founded by Linda Sackett in 1990. The company’s flagship products are MacPac and Forte, both available in Legal and Business editions.

MacPac is a document template and macro product, offering outstanding efficiency and control in the creation and revision of legal documents. MacPac is available as a complete system or as an à la carte selection of macros and templates. Forte is a cutting-edge document automation and assembly program that works within Microsoft Word. Forte brings power and sophistication to all levels of document automation—from the ad hoc, interactive creation of single documents, such as letters, pleadings, and agreements, to the pre-scheduled, unattended generation of complex multi-document packets for estate planning, real estate, human resources, marketing, and more.

Over 500 TSG installations worldwide attest to TSG’s client satisfaction. More than 25% of Am Law 100 and 200 firms are TSG clients.
